

Desktop

Redact. Review.
Release.

RapidRedact Desktop is a fast, simple redaction tool for irreversibly blotting out selected information from ALL electronic document types. It completely removes any redacted text and cleans hidden code, author's changes and data from "behind" the document. Since the content is no longer in the document, snooping or hacking into the file cannot reveal it.

Who uses RapidRedact Desktop?

Businesses

For users to manually select text, pages or sections, as well as automatically search and redact words, phrases and other items such as social security numbers.

Users

- Clerks & Court Officials
- Litigation support companies
- Law firms

To purchase RapidRedact

RapidRedact licenses are available through OEM partnerships or resellers worldwide.

- Single user licenses (small – med size business)
- Server licenses (large business - 50 or more seats)
- Enterprise licenses (companies who require end to end redaction capability including web applications)

Please contact us for product or pricing information on info@litcosys.ca

For information on a reseller in your region please access our website www.rapidredact.com

An Annual Subscription Service includes provision for software upgrades and enhancements, as well as technical support and advice.

Easily and simply reduce the time it takes to **redact** your documents, **review** them in-house or over the internet, create an audit trail, and **release** redacted copies for public viewing.

RapidRedact Products

RapidRedact Desktop

For single users who need to manually select documents, text pages or sections, and then automatically search and redact words, phrases and pages. This application integrates with your own desktop application software.

RapidRedact Developer's Toolkit

Suitable for redacting large volumes of documents, RapidRedact SDK is a software development kit which allows software engineers and developers to "redaction enable" existing systems or develop new redaction systems.

RapidRedact Webstreamer

A web extension to RapidRedact Server which enables high volume redaction capability right in your browser, over the internet. It integrates directly with your system, and works with third party web based applications.

RapidRedact High Volume Server

Ideal for companies who need an end to end redaction system that incorporates all the functionality of RR Desktop, RR Server and RR Webstreamer in 1 solution.

Minimum System Requirements

- Pentium 1-gigahertz (GHz) or higher processor
- 512 megabytes (MB) of RAM minimum
- 2 GB or higher of available hard-disk space
- Microsoft Windows 2000 or later
Microsoft Windows Server 2000 or later
Microsoft Windows XP
